

Task Tracker v2.0

Test Application

Requirements

- Should load the data below into the existing data section on page load.
- Should have the ability to create tasks that will immediately be prepended to the list.
- Should not require a web server, and should be able to run offline.
- Match the design as close as possible.
- All data exchanges should be in JSON format.
- Must be completed using jQuery or vanilla Javascript

Existing Data (JSON)

```
[  
  {"name": "Test Task #1", "date": "12/01/2012", "assigned": "John Doe"},  
  {"name": "Test Task #2", "date": "12/02/2012", "assigned": "John Doe"},  
  {"name": "Test Task #3", "date": "12/03/2012", "assigned": "John Doe"},  
  {"name": "Test Task #4", "date": "12/04/2012", "assigned": "John Doe"},  
  {"name": "Test Task #5", "date": "12/05/2012", "assigned": "John Doe"},  
  {"name": "Test Task #6", "date": "12/06/2012", "assigned": "John Doe"},  
  {"name": "Test Task #7", "date": "12/07/2012", "assigned": "John Doe"}  
]
```
